Laser Hair Removal

A safe and effective way to remove hair from any area of the body, this treatment utilizes highly concentrated beams of light to penetrate hair follicles and inhibit future hair growth. Most patients usually need 6-12 treatments for a permanent reduction of hair growth in the area.

Treatments are quick, with no discomfort, and have no downtime, making it a convenient option for long-lasting smooth skin. Results may vary based on hair color, skin type, and treatment area, so a consultation is recommended to determine the best approach for your needs.

XS $75	S $99	M $149	L $275	XL $349-$399
